PROJECTS

Ecommerce |

March 2023 – July 2023

- In this project, we created a lookalike of major e-commerce websites where users can pay and calculate their bills. I handled the design and deployment using Java and MySQL in this role.

Hand-Gesture Recognition |

December 2023 – April 2024

- I developed a hand recognition system using deep learning and natural language processing techniques where we give multiple inputs to the model and the model predicts the number of inputs given using Natural Language Processing techniques
